### Additional information:

Date: .....

Name: ..... Publisher: .....

Signature:

### New agreement or modification agreement

New agreement: The agreement does not yet exist. You have never registered it before.  
Modification agreement: You wish to modify an existing agreement.  
You can find the 'ICE agreement number' via MyAgreements in the eServices.

### Assignee

The assignee is the party receiving the rights. As a publisher, please fill in your own data here. Here you can specify under which of your possible names you wish to register this agreement. Both name, IP Name Number and society are mandatory fields.

The assignor (the party handing over the rights, in this case the composer/author) can not be mentioned. In each work registration in which you refer to this agreement, the territory and start date will be incorporated.

### Start date agreement

Here you specify the start date of the agreement. This date may not be more than one week in the future.

### Territory

Here you specify to which territory the agreement applies.

### Shares of performing rights and mechanical rights

Fill in the shares in % for both types of rights.

For '% Assignor': fill in the share of the composers and/or authors.  
For '% Assignee': fill in the share you may claim yourself as a publisher.

The sum of '% Assignor' and '% Assignee' must be equal to 100%.  
The share '% Assignee' may not exceed 50%.

You can register shares per specific use online via our eServices > MyAgreements.

If you change the shares of an agreement, all works in which you applied the initial right allocation will be changed. Works with deviating shares will remain unchanged.

### Retroactive collection

Here you specify whether you are entitled to income prior to the start date.  
If you answer 'YES', you can specify an exact date. If you do not specify a date, the retroactive collection applies to the entire period prior to the start date.

### Apply general sub-publishing agreements

Yes: apply general sub-publishing agreements known to ICE to this agreement.  
No: do not apply general sub-publishing agreements known to ICE to this agreement. The sub-publication will thus not be applied automatically to the works.

### Additional information

Here you can add additional comments.
